Junior web developer skilled in programming from inception to deployment. Skilled in writing legible, testable, and efficient code using modern web development practices. Highly adaptable and a fast learner. Able to apply new syntax as cutting-edge scripting languages adapt to the needs of the modern world.

Skills & Abilities

TECHNICAL SKILLS

JavaScript	PostgreSQL	Firebase
jQuery	MongoDB	MERN/AN stack
AngularJS	REST	TypeScript
React	Express	Git
HTML5	AJAX	**Team Git**
CSS3	Angular 2/4	Agile

MANAGEMENT
· Assisted in managing an Angus cattle herd. Responsibilities included daily observation of the overall health of the herd, analysis of prospect sires for a genetic and phenotypically fit model to match with herd females, close observation and prediction of gestation during breeding and birthing season, accurate measurement and calculation of feed mixtures for optimum growth performance, and landscape management for ease of access to the herd as the livestock roam the fields.

LEADERSHIP
· 2 years as a 4-H Junior Leader, introducing young children into the 4-H program and assessing aptitude for suggesting possible projects.

Experience

PHOTOGRAPHER | THE STATESMAN | 2016-2017
· Attend events on campus and photograph to publish images alongside articles in the campus newspaper.
· Several photographs published as front-page articles.
